

## Memorandum

**To:** The Honorable Chief Justice of India  
and His Companion Justice of the Supreme Court of India

**From:** H. E. Puthoff, PhD  
President & CEO, EarthTech International, Inc.

**Date:** 29 April 2019

**Re:** Unidentified Aerial Phenomena (UAP)

---

Your Honors:

As Chief Executive Officer of EarthTech International, a high-technology R&D firm (see [www.earthtech.org](http://www.earthtech.org)), I was invited by the U.S. Department of Defense (DoD) to be a Senior Advisor and Contractor to the DoD's AATIP program (Advanced Aerospace Threat Identification Program). Its purpose was to assess the threat potential of the incursion of unidentified aerial phenomena over the territory of the continental United States and adjoining seacoasts.

This program, established by Congressional Mandate, was a result of observation of such phenomena in the vicinity of our military deployments, both static (e.g., nuclear missile sites) and dynamic (e.g., U.S. aircraft carrier groups). As military detection equipment (e.g., radars) became more sophisticated, the more certain it was that the phenomenon under observation was extremely advanced in its apparent technological superiority and thus potentially of threat concern should hostile intent be there.

During the 'Cold War' confrontations between the U.S. and the Soviet Union led to the realization that misidentification of such technology as representing a hostile adversarial attack could inadvertently trigger a devastating nuclear exchange.

In light of the often tense relationship between India and Pakistan, it would appear that it would be in both India's and Pakistan's interests to establish an in-depth

Program to address the UAP topic with sufficient resources so as to minimize the possibility of misidentification of UFO activities that could result in a conflict between the two nuclear armed states. Just such a policy has recently been inaugurated by the U.S. Navy as outlined in the attached article in *Politico* magazine.

As someone who has spent more than 20 years studying the UAP/UFO phenomenon, I would humbly advise the Hon'ble Court to give due considerations to the petition of Mr. Sabir Hussain. If I can be of further assistance in supporting an UFO study initiative, please do not hesitate to contact me.

H. E. Puthoff
